1.1 Product class

Class 1: Batch or mass-produced products •

1.2 Product name

Product Category - Bremick Washers

1.3 Product description and its intended use

Washers for interior and exterior use in all NZS 3604 Exposure Zones and environments, subject to type, size and material selection.

1.4 Product identifier (if applicable)

Refer to Appendix for unique product listing

1.5 Place manufactured (New Zealand or overseas)

Manufactured overseas to strict Bremick specifications.

1.6 Relevant Building Code clauses

| _ | |
|--|---|
| B1 Structure | Performance clauses B1.3.1, B1.3.2, B1.3.3 and B1.3.4 |
| B2 Durability | Performance clauses B2.3.1 a) and B2.3.1 b) |
| C3 Fire Affecting Area Beyond the Source | Performance clause C3.7 a) |
| C6 Structural Stability | Performance clause C6.2 |
| F2 Hazardous Building Materials | Performance clause F2.3.1 |

1.7 Statement of how the building product is expected to contribute to compliance

B1 Structure - B1.3.1, B1.3.2, B1.3.3 and B1.3.4

• Fixings/fasteners contribute to the structural integrity of building elements. Compliance demonstrated through design to NZS 3604 and Specific Engineered Design.

Compliance Pathway

Buildings up to 3 storeys ≤10m in height

Compliance demonstrated through design to NZS 3604.

<u>Buildings >10m in height</u>

Specific Engineered Design. Refer also to BPIR Product Review - Structural Bolt Assemblies.

B2 Durability

- B2.3.1 a) 50 years where used to fix structural or difficult to replace elements
- B2.3.1 b) 15 years where used to fix non-structural or moderately difficult to replace building elements

304 Stainless steel, 316 Stainless steel and Hot-dipped galvanised washers (to AS/NZS 4680) achieve 15 and 50 year durability, subject to Exposure Zone and Environment. Other finishes suitable for interior use only with the exception of corrosive internal environments.

Compliance Pathway

Buildings up to 3 storeys ≤10m in height

Compliance demonstrated through material selection to NZS 3604:

- Table 4.1 Protection required for steel fixings and fastenings excluding nails and screws
- Table 4.2 Galvanising of steel components other than nails and screws

Galvanising to: AS/NZS 4680 - Hot-dip galvanised (zinc) coatings on fabricated ferrous articles 600g/m² average

Type 304 stainless steel is sufficient to comply with NZBC requirements, but may have surface rust. 316 Stainless steel exceeds the requirements of the NZBC.

Buildings >10m in height

Specific Engineered Design. Also refer to BPIR Product Review - Structural Bolt Assemblies.

C3 Fire Affecting Area Beyond the Source - C3.7 a)

• Washers are manufactured from non-combustible materials, as defined in NZBC C/AS2.

Compliance Pathway

NZBC C/AS2:

External wall cladding systems for multi-level buildings with a building height ≥ 25 m

5.8.4 The entire external wall cladding system shall be:

a) Non-combustible or limited combustible materials

Non-combustible is defined in NZBC C/AS2 as:

Material either -

a) composed entirely of glass, concrete, steel, brick/block, ceramic tile, or aluminium; or

b) classified as non-combustible when tested to AS 1530.1; or

c) classified as A1 in accordance with BS EN 13501-1.

C6 Structural Stability - C6.2

• Washers are manufactured from non-combustible materials, as defined in NZBC C/AS2.

Compliance Pathway

Fixings/fasteners contribute to the structural integrity of building elements/structural systems.

Buildings up to 3 storeys ≤10m in height

Compliance demonstrated through design to NZS 3604.

Buildings >10m in height

Specific Engineered Design. Also refer to BPIR Product Review - Structural Bolt Assemblies.

F2 Hazardous Building Materials - F2.3.1

• Washers are manufactured from non-toxic / safe to handle materials.

1.8 Limitations on the use of the building product

For interior and exterior use in all NZS 3604 Exposure Zones and Wind Zones subject to material selection.

1.9 Design requirements that would support the appropriate use of the building product

• Buildings designed to NZS 3604 Timber-framed buildings or Specific Engineered Design.

1.10 Installation requirements

- 1. Select washer to match the diameter of the bolt, set screw or threaded rod
- 2. Position washer under the bolt head or nut prior to assembly/tightening
- 3. Tighten threaded fastener as required ensuring the washer is firmly seated against the fixture, bolt head or nut

1.11 Maintenance requirements

- Stainless steel Periodic cleaning in accordance with Bremick guidance.
- Periodically inspect the fastener for corrosion.

1.12 Building Act 2004 section 26 compliance

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?

1.10 Installation requirements

- 1. Select washer to match the diameter of the bolt, set screw or threaded rod
- 2. Position washer under the bolt head or nut prior to assembly/tightening
- 3. Tighten threaded fastener as required ensuring the washer is firmly seated against the fixture, bolt head or nut

1.11 Maintenance requirements

- Stainless steel Periodic cleaning in accordance with Bremick guidance.
- Periodically inspect the fastener for corrosion.

1.12 Building Act 2004 section 26 compliance

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?
